

HOUSTON 10-144 (4 pages)

**Alaska Small Cities
Energy Efficiency and Conservation Block Grant (EECBG)**

**Grant Application, Option 1
(For option 1 applicants only)
Opt-In Technical Assistance**

1. Name of City or Borough: City of Houston

2. To what extent is the community committed to coordinating, planning and working with the contractor? Please describe.

The City of Houston has available staff to assist with project planning and access to all buildings.

3. Will in-kind support be provided to the project by the community? If so, please describe the types of in-kind support that are available (labor, storage, lodging, other), and the extent to which it is available.

Houston can provide a laborer to assist in clean up of projects. The City can also provide a 30x30 storage area to store supplies if needed.

4. If known, what buildings or facilities would the city like the contractor to focus on during the audit portion of the work? If specific known opportunities exist in any of these buildings, please list them in "additional comments" section below.

#	Name of Building or Facility	Street Address	Sq. Ft.	Sector
1.	Public Safety Building	13878 W. Armstrong Rd.	6,000	Public Building
2.	Houston City Hall	13895 W. Armstrong Rd.	3,200	Public Building
3.				Select from Arrow
4.				Select from Arrow
5.				Select from Arrow

If additional space is needed, please list other buildings in the "Additional comments" box below.

HOUSTON 10-144 (4 pages)

5. Summary of Project

To upgrade the building's envelope to today's energy requirements and therefore reducing our annual utility costs considerably. The city hall and public safety buildings are 26 and 28 years old. Neither of them have had energy upgrades other than, new siding installed in 1997. Our needs are great, we won't know to what extent the upgrades will be until after the energy audit has been performed. At that time priorities would be established to attend to the most needy of upgrades.

6. Additional Comments

We look forward to working with the energy audit contractor to establish goals for the remodel of our buildings. As we have stated our needs are great, and we are hopeful that we qualify for the funding required to weatherize each of our buildings.

HOUSTON 10-144 (4 pages)

**Alaska Small Cities
Energy Efficiency and Conservation Block Grants**

Budget Form

Name of City or Borough: Houston, Alaska 99694

Table A: Full Project Budget

Line	Funding Source	Budgeted Amount
1.	EECBG funds requested	\$ 80,900
2.	City/borough matching or in-kind contributions	\$ 0
3.	Funding from other sources*	\$ 0
4.	Estimated total project cost	\$ 80,900

* Identify other sources from line 3, and whether sources are confirmed or pending:

Until we receive the energy audit we are not able solicit or advertise for public support from the community. At that time we will advertise the project and expect the community to respond favorably.

Table B: EECBG Funding Breakdown

Please budget how the EECBG funding (Table A, line 1 above) breaks down between the following categories. Please note that the energy audit cost column may not be more than 50 percent of the total.

Expense Categories	Energy Audit Costs	EEM/ECM Costs**	Total
Personnel	\$	\$	\$ 0
Travel	\$	\$	\$ 0
Materials & Supplies	\$	\$	\$ 0
Equipment	\$	\$	\$ 0
Contractual	\$	\$	\$ 0
Total	\$ 0	\$ 0	\$ 0

**EEM: Energy Efficiency Measure, ECM: Energy Conservation Measure; defined in EECBG Funding Announcement and Instructions document.

Budget Narrative

Please briefly describe the use of EECBG funds and any matching funds, as categorized above:

Again we look forward to the energy audit to establish priorities for the weatherization project. At this time we aren't able to direct any activities toward recruitment of public interest. We as a small community are extremely interested in the city budget and reducing the energy usage is a top priority.

KACHEMAK 10-102 (4 pages)

Alaska Small Cities
Energy Efficiency and Conservation Block Grant (EECBG)

Grant Application, Option 1
(For option 1 applicants only)
Opt-In Technical Assistance

1. Name of City or Borough: City of Kachemak

2. To what extent is the community committed to coordinating, planning and working with the contractor? Please describe.

The City of Kachemak would like to have an energy assessment or energy audit of the Kachemak Community Center building and then look at having the most cost effective measures implemented.

3. Will in-kind support be provided to the project by the community? If so, please describe the types of in-kind support that are available (labor, storage, lodging, other), and the extent to which it is available.

We would be able to offer limited storage and an office to the contractor.

4. If known, what buildings or facilities would the city like the contractor to focus on during the audit portion of the work? If specific known opportunities exist in any of these buildings, please list them in "additional comments" section below.

Table with 5 columns: #, Name of Building or Facility, Street Address, Sq. Ft., Sector. Row 1: 1, Kachemak Community Center, 59906 Bear Creek Drive, 4,000, Public Building. Rows 2-5: 2-5, empty, Select from Arrow.

If additional space is needed, please list other buildings in the "Additional comments" box below.

5. Summary of Project **KACHEMAK 10-102 (4 pages)**

Our community building was built in the 1980's. The boiler and hot water baseboard heat were done in the early 1990's. Many, if not all of our double paned windows are leaking and during cold weather it is hard to keep the building warm.

6. Additional Comments

We would like to use local hire and local suppliers as much as possible with this grant.

**EEM: Energy Efficiency Measure, ECM: Energy Conservation Measure; defined in EECBG Funding Announcement and Instructions document.

Budget Narrative

Please briefly describe the use of EECBG funds and any matching funds, as categorized above:

The City of Kachemak would like to make cost-effective energy improvements to the Kachemak Community Center. The City offices, a multi-purpose room, council chambers, and garage for Kachemak's fire truck are located in the Community Center.

Alaska Small Cities
Energy Efficiency and Conservation Block Grant (EECBG)

Grant Application, Option 1
(For option 1 applicants only)
Opt-In Technical Assistance

1. Name of City or Borough: City of Seldovia

2. To what extent is the community committed to coordinating, planning and working with the contractor? Please describe.

The City of Seldovia commits to making staff available to assist in the coordination with the selected service provider. This includes project planning, allowing access to all buildings and facilities in a time appropriate manner and providing local transportation. The city manager will be the point person for the service provider. The city staff will also install the selected lighting/doors, etc in the Multipurpose Building and City Hall.

3. Will in-kind support be provided to the project by the community? If so, please describe the types of in-kind support that are available (labor, storage, lodging, other), and the extent to which it is available.

The City of Seldovia will provide the selected service provider with two plant operators to handle all installation. We will budget 400 hours but can increase if needed. We will also pick up and store all supplies needed for the completion of this project. A truck will be made available for the service providers transportation.

4. If known, what buildings or facilities would the city like the contractor to focus on during the audit portion of the work? If specific known opportunities exist in any of these buildings, please list them in "additional comments" section below.

Table with 5 columns: #, Name of Building or Facility, Street Address, Sq. Ft., Sector. Contains two rows of building data and three rows with 'Select from Arrow' in the Sector column.

If additional space is needed, please list other buildings in the "Additional comments" box below.

5. Summary of Project **SELDOVIA 10-160 (4 pages)**

The City of Seldovia has selected Option 1 and greatly appreciates this technical assistance. Although there are some obvious things that could be done to make us more energy efficient we will wait for the service provider to determine the full scope of work. The two buildings that we would like to work on are the Multipurpose Building and City Hall.

6. Additional Comments

We are willing to make whatever timeline you set out. Things are alot easier to do during the summer months.

**EEM: Energy Efficiency Measure, ECM: Energy Conservation Measure; defined in EECBG Funding Announcement and Instructions document.

Budget Narrative

Please briefly describe the use of EECBG funds and any matching funds, as categorized above:

The City of Seldovia has committed to contribute at least \$13,500 of in kind services to get the most out of the funds provided. The EECBG funds will be managed and reported on by the selected service provider. The city will provide the service provider timely updates of our cash and in kind spending for each quarterly report.
