

Emerging Energy Technologies Fund

Initial Response to Request for Grant Applications AEA-11-027

On January 7, 2011, the Alaska Energy Authority published the Request for Grant Applications (RFA) AEA-11-027 for the Emerging Energy Technology Fund. The RFA closed at 5pm on March 17, 2011.

The AEA received 57 applications. Approximately \$22 million in EETF grants are requested. The current funding level for the EETF is \$4.8 million, comprised of \$2.4 million from the Alaska State Legislature and \$2.4 million from the Denali Commission.

AEA is currently reviewing applications for eligibility. All eligible applications will be evaluated by the EETF Advisory Committee, and recommendation applications will proceed with full proposals—approximately 250% of the total grant funds available, or top 20 applications, whichever is greater.
